Cotton, A.P. and Tayler, W.K. (2000)
Services for the Urban Poor:
Section 1. Guiding Principles
WEDC, Loughborough University, UK.

ISBN Paperback 0 906055 78 4

This document is an output from project R7292 funded by the UK
Department for International Development (DFID)
for the benefit of low-income countries.
The views expressed are not necessarily those of DFID.

Designed and produced at WEDC

Printed by Quorn Selective Repro, Loughborough

Acknowledgements

The financial support of the Department for International Development of the British Government is gratefully acknowledged. The authors would particularly like to thank their many urban engineering colleagues and friends throughout India, Pakistan and Sri Lanka with whom they have worked for the last fifteen years. Their experience has been central to the preparation of this work. Mr P Srinivasa Rao from Hyderabad, India provided a critical review of earlier drafts and additional material for Sections 4 and 6. Colleagues at WEDC and GHK Research and Training provided information and comments throughout the development of the work. We also acknowledge the inclusion of some material from earlier work jointly authored with Dr Richard Franceys. Finally, we wish to acknowledge Sue Cotton for her editorial contributions and the patience and skill of Rod Shaw and Glenda McMahon of the WEDC Publications Office in the design and production of the manual.

Contents

Who should read this	1.1
Objectives of this section	1.1
What this section tells you	1.1
Policy context	1.3
Why improve urban services?	1.4
Improving urban services: sustainability	1.5
Who are the stakeholders?	1.5
Networked and non-networked infrastructure	1.8
Managing urban services	1.8
Focus on services rather than infrastructure	1.11
Why involve people with service provision?	1.11
Demand based approaches	1.12
External finance and subsidy	1.13
Levels of service	1.15
Gender issues	1.16
Action planning	1.17
Risks	1.18
Now read on	1.19
