Ockelford, J. and Reed, R.A. (2006)
Participatory Planning for Integrated Rural Water Supply and Sanitation Programmes (third edition)
WEDC, Loughborough University, UK.

ISBN 1 84380 098 5

This document is an output from a project funded by the UK
Department for International Development (DFID)
for the benefit of low-income countries.
The views expressed are not necessarily those of DFID.

Designed and produced at WEDC

About the authors

Jeremy Ockelford is a civil engineer specialising in water supply and sanitation in developing countries. He has considerable experience in planning, management and evaluation of water supply and sanitation projects and programmes in Asia and Africa with governments, donors and NGOs. He is particularly interested in the interface between people and technology in the process of development, and in the institutional issues of governments, NGOs and communities working together. He works as an independent consultant based in London.

Bob Reed is a Senior Programme and Project Manager at the Water, Engineering and Development Centre. He specializes in water supply and sanitation for rural areas, low-income urban communities and refugees. He has considerable experience of training, design and project implementation in the Pacific, the Caribbean, Asia and Africa. In recent years he has focused on the provision of improved and sustainable water supply and sanitation systems for displaced populations.

The authors would like to hear from anyone who uses the guidelines in the field with comments on their usefulness and areas which require adaptation or improvement. Please forward comments or suggestions to Bob Reed at WEDC.

The contributors

Nick Robins was a hydrogeologist with the British Geological Survey

Mimi Khan was a free lance Health Consultant working with water and sanitation in addition to a range of other international public health issues

Jane Bañez-Ockelford is a health professional with extensive experience in community development and participatory learning approaches.

Henry Gunston was a hydrologist with the Centre for Ecology and Hydrology

Roger Calow was a socio-economist with the British Geological Survey

Acknowledgements

The authors would like to thank the following for the various contributions that they have made to the development of these *Guidelines and Manual*:

Siyan Malomo of the Commonwealth Secretariat in London, for his original idea, for his continued interest in and support of the project, and for making arrangements for the pilot studies.

Robin Herbert and Beatrice Gibbs, both formerly of BGS, for some early inputs into the concept of the guidelines.

Ian Smout of WEDC, for his constructive criticism and support.

For assistance and support in the First Pilot Study in Zimbabwe:

George Nhunhama and Benedict T. Majaya of the National Co-ordination Unit;

Columbus Chimani, Solomon Makan'a and other members of the National Action Committee;

Members of the Provincial Water Supply & Sanitation Sub-Committee in Manicaland;

Members of the Water Supply & Sanitation Sub-Committees in Nyanga and Makoni Districts.

For assistance and support in the Second Pilot Study in Zambia:

Dennis Mwanza and other staff of the Reform Support Unit, Lusaka;

Pola Kimena, Chimwang'a Maseka and Simon Kang'omba, Department of Water Affairs;

S.T. Chisanga, Ministry of Health, Lusaka;

Evaristo Makwaya, Ministry of Community Development & Social Affairs, Lusaka;

Oswald Mwansa and Vincent M. Nguluwe, Department of Water Affairs, Northern Province;

Kayula Siame, Provincial Planning Unit, Northern Province;

Officers of Luwingu, Chinsali and Isoka Districts;

Participants of the Planning Workshop, from all the Districts of Northern Province.

Participants of the workshops at the 22nd WEDC Conference in New Delhi, India, and the 23rd WEDC Conference in Durban, South Africa, for discussions on the concept and content of the project.

The 1998, 1999, and 2000 M.Sc. students at WEDC, who practised some of the participatory planning methods for their water resource management module and provided some useful insights.

For reviewing the final draft of the *Guidelines* and providing constructive criticism and support, special thanks are due to:

Bente Schiller, Royal Danish Ministry of Foreign Affairs

Gerd Foerch, GTZ, Addis Ababa

Paul Dean, Consultant

Kimberly Clarke, for editorial review of the *Guidelines*.

Finally, *maraming salamat* to Jane, for all her support, encouragement, ideas (particularly on community development issues and participatory methods), contributions and criticism, and especially for her patience.

‘Every country has its own version of vegetable soup.’

From an unknown training manual on Culture and Development, quoted by Parimal Jha in the Foreword to *Fancy Footwork: Entrapment in and Coping with the Nepali Management Model*, Ivan Gyozo Somlai, 1992, published by Ratna Pustak Bhandar, Kathmandu.
