Cotton, A.P. and Tayler, W.K. (2000)
Services for the Urban Poor:
Section 4. Technical Guidelines
WEDC, Loughborough University, UK.

ISBN Paperback 0 906055 81 4

This document is an output from project R7292 funded by the UK Department for International Development (DFID) for the benefit of low-income countries.
The views expressed are not necessarily those of DFID.

Designed and produced at WEDC

Printed by Quorn Selective Repro, Loughborough

Acknowledgements

The financial support of the Department for International Development of the British Government is gratefully acknowledged. The authors would particularly like to thank their many urban engineering colleagues and friends throughout India, Pakistan and Sri Lanka with whom they have worked for the last fifteen years. Their experience has been central to the preparation of this work. Mr P Srinivasa Rao from Hyderabad, India provided a critical review of earlier drafts and additional material for Sections 4 and 6. Colleagues at WEDC and GHK Research and Training provided information and comments throughout the development of the work. We also acknowledge the inclusion of some material from earlier work jointly authored with Dr Richard Franceys. Finally, we wish to acknowledge Sue Cotton for her editorial contributions and the patience and skill of Rod Shaw and Glenda McMahon of the WEDC Publications Office in the design and production of the manual.

Contents

Who should read this 4.1
Objectives of this section 4.1
What this section tells you 4.1
Tools 4.1

Section 4a – Drainage
Key points about drainage 4.4

Tool D1 Drainage: Objectives and options 4.5
Objectives 4.5
Sullage drainage systems 4.6
On-plot disposal 4.6
Surface water drains 4.7
Sewerage 4.8
Surface water drainage systems 4.8
Rapid removal 4.8
Storage on site 4.8
Temporary retention 4.9
Removal of surface water 4.9
The total system 4.9

Tool D2 Drainage: Planning 4.13
Initial appraisal 4.13
Drainage layout 4.14
Preparing plans for drainage schemes 4.15

Tool D3 Drainage: Design 4.17
Estimating surface water runoff 4.17
Drainage catchment 4.17
Calculation of runoff 4.18
Rainfall intensity 4.19
Design intensities for small areas 4.20

Effect of storage on run-off 4.21
Estimation of available falls 4.21
Drain design 4.22
Tertiary drainage routes 4.22
Primary/secondary drain capacity 4.23
Types of drain 4.27
Unlined ditches 4.27
Open drains 4.27
Covered drains 4.27
Road as drains 4.29
References 4.30

Tool D4 Drainage: Handy Tips 4.31

Section 4b – Water supply
Key points about water supply 4.38

Tool W1 Water Supply: Objectives and options 4.39
Objectives 4.39
Water quantity 4.39
Accessibility and reliability 4.39
Water quality 4.40
Options: Sources of water 4.40
Unprotected sources 4.40
Off-site sources 4.40
On-site groundwater 4.41
Rainwater 4.41
Options: Levels of service 4.42
Communal supply points 4.43
Individual house supply 4.44
Water vendors 4.44

Tool W2 Water Supply: Planning 4.45
Tertiary facilities 4.45
Primary and secondary mains 4.45
Adequacy of existing supply 4.47
Extent of supply area to be considered 4.47
Existing supply capacity 4.48
Population 4.49
Industrial, commercial and institutional demands 4.49
Assessment of existing per-capita supply 4.50
Decisions on levels of service 4.50
Type of connections 4.50
Continuity of supply 4.51
Design per-capita consumption 4.51
Additional bulk supply and storage facilities 4.51

Annex 1. Information required for overall planning and design 4.54
Population 4.54
Per-capita consumption 4.54
Industrial, commercial and institutional demands 4.54
Fire demands 4.55
Peak demands 4.55
Leakage and wastage 4.56

Tool W3 Water supply: Design 4.58
General approach to distribution system design 4.58
Design of tertiary mains 4.58
House connections 4.59
Public standposts 4.59
Number of taps required 4.60
Primary/secondary system design 4.62
Pipe materials 4.64

Operational features 4.67
Sluice valves 4.67
Fire hydrants 4.68
Washouts 4.69
Air-valves 4.69

Tool W4 Water supply: Handy Tips 4.70

Section 4c – Sanitation

Key points about sanitation 4.74

Tool S1 Sanitation: Objectives and options 4.75

Objectives of sanitation 4.75
Sanitation options 4.77
Individual, shared and communal latrines 4.77
Management and institutional linkages 4.78
Costs and subsidies 4.79

Tool S2 Sanitation: Planning on-plot systems 4.83

On plot sanitation systems 4.83
Pit latrines 4.83
Pour flush pit latrines 4.85
Other improved latrines 4.87
Sealed lid pit latrines 4.87
Ventilated improved pit latrines (VIPs) 4.87
Problems caused by ground conditions 4.87
Problems caused by high water table 4.89
The groundwater pollution problem 4.89
Double pit latrines 4.91
Raised pit latrines 4.92
Septic tanks 4.92

Tool S3 Sanitation: Design of on-plot systems 4.95
Pit latrines 4.95
Septic tanks 4.97

Tool S4 Sanitation: Sewerage planning 4.100
About sewerage 4.100
Types of system 4.100
Sewer networks 4.101
Sewer layout 4.102
Local (tertiary) sewers 4.102
Collector (primary and secondary) sewers 4.104
Preparing plans for sewerage schemes 4.104
Decentralised sewerage 4.105

Tool S5 Sanitation: Sewerage design 4.109
Design objectives 4.109
Conventional tertiary sewers 4.109
Number of houses served 4.109
Design flow 4.109
Determination of sewer diameter 4.110
Sewer gradient 4.111
Primary/secondary systems 4.113
Determination of catchment areas 4.113
Calculation of design populations 4.113
Calculation of design flow 4.113
Determination of sewer gradients 4.115
Determination of sewer diameter 4.116
Invert levels and manhole types 4.116
Design standards and details 4.118
Minimum cover 4.118
Manhole and chamber dimensions 4.119
Manhole location and spacing 4.119
House connections 4.121

Tool S6 Sanitation: Handy Tips 4.124

Section 4d – Access and Paving

Key points about access and paving 4.128

Tool P1 Access and paving: Objectives and options 4.129

Access 4.129

Paving 4.131

Tool P2 Access & Paving: Planning 4.133

Background 4.133

Hierarchy of access 4.133

Access and pavement width 4.133

Pavement levels 4.136

Typical cross-sections 4.136

Preparing plans for paving 4.138

Tool P3 Access & Paving: Design 4.139

Unbound pavements 4.139

'Black-top' roads: flexible pavements 4.140

Concrete pavements 4.140

Brick and block pavements 4.141

Pavement design 4.142

Pavement depth 4.142

Edge details 4.144

Structural design of black top roads 4.146

Loading 4.146

Subgrade strength 4.146

Procedure for determining pavement depth 4.147

Preparing plans for paving 4.149

Tool P4 Access and Paving: Handy Tips 4.150

Section 4e – Solid Waste Management
Key points about solid waste management 4.160

Tool SW1 Solid Waste Management: Objectives and options 4.161
The need for operational management 4.162
Options: municipal management 4.163
Options: maximise waste recovery 4.163
Options: local enterprises as a response to poor service 4.164

Tool SW2 Solid waste management: Planning 4.165
Components of solid waste management systems 4.165
Investigating the existing situation 4.165
Storage of solid waste 4.168
Household storage 4.168
Communal storage 4.168
Collection systems 4.169
Collection vehicles 4.171
Short-range transfer 4.172
Waste disposal 4.172
Sanitary landfill 4.175
Reference 4.175

Tool SW3 Solid waste management: Local Initiatives 4.177
Introduction: micro-enterprises 4.177
Individual-based initiatives 4.177
Organised local initiatives: general 4.178
Organised local initiatives: 4.179
Area-based system which pays sweepers individually 4.179
Organised local initiatives: 4.180
Area-based system which pays sweepers collectively 4.180
Organised local initiatives: Small-scale contractors 4.181
Further information 4.181

Tool SW4 Solid Waste Management: Handy Tips 4.183

Section 4f – Power supply and lighting

Key points about power supply and lighting 4.184

Tool L1 Power supply and lighting: Objectives and options .. 4.185

Objectives 4.185
Mains electricity supply 4.185
Fixed current supply 4.185
Distribution systems 4.186

Tool L2 Power supply & lighting: Planning 4.187

Power demand 4.187
Primary distribution 4.187
Transformers 4.187
Secondary distribution 4.188

Tool L3 Power supply & lighting: Design 4.192

Power demand 4.192
Transformers 4.192
Power distribution losses 4.192
Overhead lines and poles 4.193
Power supply for street and security lighting 4.195
Lamps for street and security lighting 4.195
Lighting theory terminology 4.196
Lighting levels 4.196
Design procedure 4.198
Switching 4.202
Fixtures 4.202

Tool L4 Power Supply and Lighting: Handy Tips 4.203
