

## **Appendix 3.5 Data Analysis**

Included in this section are three examples of progression of the data coding and secondary analysis.

Appendix 3.5.1 provides an example of the initial coding table, and Appendix 3.5.2 provides the final version of the codebook used NVivo. Some subnodes are shown closed to protect data.

Appendix 3.5.3 provides an example of thematic narrative which has been placed in a table for secondary analysis of cause and effects.
